

CHANGELOG **LIVE** UPDATED 2026-09-28

Changelog

2026-09-28 — Whitepaper hub opens (M3)

- **Company whitepaper v1.0** — chapter skeleton (0–10, appendix, legal notice) published as a draft. Body text is being written separately.
- **DePIN technical specification v0.3** — the former paper.wellbianlabs.io page served unchanged at `/depin`. Conversion to MDX (v0.4) follows.
- **Weather Market protocol whitepaper v3 (2026-09)** — migrated from the oracle site, English and Korean.
- **Weather Fi — settlement rules and product design v2 (2026-09-24)** — the simulator's whitepaper and settlement-rules pages merged into one document, English.
- **Tokenomics** — linked to tokenomics.wellbianlabs.io, the source of record for every figure.
- `/llms.txt` and a `.md` route for every document.

2026-09-24 — Weather Fi v2

- Anchors read from Flare SnapshotAnchor; verdict classes; new products (station days, index markets, ladders, events).

2026-09 — Weather Market v3

- Determinations sold, not data; Flare SnapshotAnchor as anchor of record since 2026-09-23; XRP payment; USDT on BNB retired.

2026-08 — DePIN v0.3

- [IAQ / OAQ Data Ecosystem — Whitepaper & XRPL Technical Specification](#). XRPL mainnet live 2026-08-13.
